

Placement Guidelines

Fictional reference document for the GenAI RAG workshop

This document is fictional and created only for training and demonstration. It is not an official college policy.

Placement Registration

Eligible students must register with the placement office using the process announced for their batch. Students should provide accurate academic, contact, resume, and skill information.

Basic Eligibility

For this fictional policy, a student must have no active academic backlogs at the time of a company's eligibility check unless the company explicitly permits otherwise. Students must also satisfy the criteria in the individual job description.

Required Documents

Students may be asked to provide a current resume, college identity card, academic mark sheets, government-issued identification, and other documents specified by the recruiting company.

Recruitment Process

A typical process may include application screening, an aptitude or technical assessment, technical interviews, an HR interview, and final selection. The exact process varies by company.

Student Responsibilities

Students must attend registered recruitment activities on time and follow instructions from the placement office and recruiting company. False information or intentional violations may result in removal from the recruitment process.

Preparation

Students are encouraged to strengthen technical fundamentals, communication skills, problem-solving ability, aptitude, resume quality, and interview readiness.
